

Small Group Training Sessions on

METABOLOMICS ANALYSIS

TRAC
Tuberculosis Research Advancement Center
Emory/Georgia

The goal of the small group metabolomics training sessions will be to provide instruction on the analysis of metabolomics data in TB research. The first session will provide an overview of the field of metabolomics, possible experimental approaches, and study design considerations for TB research. Subsequent sessions will provide hands-on training in available computational tools for metabolomics data analysis.

Friday, May 03 2024

9:00 AM - 10:00 AM
